

Join us for a **Public Meeting** for the **West Trunk Sewer Main Replacement**

You're invited to a public meeting to review the project plans for the **West Trunk Sewer Main Replacement Project**. This meeting is an opportunity for residents to learn about the project, understand anticipated impacts, and provide feedback before construction begins.

Project Overview

The **West Trunk Sewer Main Replacement Project** includes the following improvements:

- **West Trunk Sewer Replacement:** Replacement of an aging and undersized sewer main to improve system capacity and reliability.
- **Holt Drive Pressure Sewer:** Installation of a new pressure sewer main along Holt Drive, including new pump systems for affected private residences.
- **Collection System Rehabilitation:** Rehabilitation of existing manholes in the Harbor Village and Lake Pointe areas to reduce inflow, infiltration, and maintenance needs.
- **Harbor Heights Boulevard Water Main Replacement:** Replacement of an aging water main adjacent to the new sewer main.
- **Backup Generators for Critical Lift Stations:** Installation of new standby generators at Harbor Village #1 and the North Main Lift Station to improve system resilience.

Project Benefits

- ① Increased system reliability
- ② Reduced risk of sewer overflows
- ③ Improved water service and fire protection
- ④ Brings aging infrastructure up to current standards

Anticipated Road Closures During Construction

- **Harbor Heights Boulevard:** From the Wastewater Treatment Plant to Holt Drive
- **Holt Drive:** From Flathead Lake Brewery to the intersection with Chapman Hill Road
- **Chapman Hill Road:** From Holt Drive to the north end of the Mill Creek Subdivision

Project Schedule

A detailed construction schedule will be finalized after bidding and contractor selection. Current expectations anticipate construction over **two seasons, beginning as early as spring 2026 and finishing by fall 2027.**
